- **Backend:** .NET Core (C#), Java, Node.js, Kotlin, Flask (Python) and PHP
- **Frontend:** HTML5, CSS3, JavaScript, WordPress, React, TypeScript, Next.js and Angular
- **Databases:** MySQL, SQL Server, and MongoDB.

PROJECTS

DPTelemetry – C#

Mobile app to analyze real-time telemetry data during racing sessions. Compatible with CPA5420 devices, enabling drivers and teams to study detailed track performance.

GodStyle App – Kotlin

Mobile app to manage appointments for clients and hairdressers. Features include booking, service pricing, history viewing, reminders, schedule management, client communication, and real-time statistics.

HekaHydr – WordPress

Corporate website for a hydraulic solutions company, focusing on usability and responsiveness. Highlights product catalogs and service descriptions to boost customer engagement.

Neobiosur – WordPress

Website for a biomass heating system provider in Dos Hermanas (Sevilla). Emphasizes sustainability, efficiency, and client satisfaction.

Kuboo – WordPress

Digital solutions company website with over 15 years experience and 150+ projects, showcasing consulting, design, and implementation services.

GodStyle Web – JavaScript

Web platform for appointment management between hairdressers and clients, with online booking, notifications, service control, and performance monitoring.
